Now you can play the ATARI arcade hits—no matter which video game system you own. Because now there's ATARISOFT. ATARISOFT is a special division of Atari that is putting their best games on cartridges that play on your video systems.

Practice your Centipede.[™] Rediscover Defender.¹ Improve your PAC-MAN.² Or get a grip on Galaxian.³ Now on your ColecoVision or Intellivision.

ATARISOFT titles are available just about anywhere you find your other video game products. And in the very near future ATARISOFT is going to bring you even more choices with a whole line-up of top-selling ATARI arcade hits to enhance your video game library.

So now that there's ATARISOFT, the best way to play ColecoVision or Intellivision—is with Atari!

As the savior of an alien race, you soar over a blighted landscape on a desperate mission to save frightened humanoids from clouds of dreaded attack craft.

Crawling toward you through the mushroom patch, the centipede is joined by his equally creepy companions, the spider, flea, and scorpion. But don't worry, they're all really quite friendly—so long as you keep them at a distance.

Probably the best-known video game since Atari invented Pong.[®] And Atari brings the original dot-gobbler and his ghostly pursuers to you with the vivid color and excitement of the arcade original.

(FOR MATTEL INTELLIVISION ONLY)

Invasers are swarming toward the earth—and they're coming in fast. Only you are airborne. So only you can head them off before they touch ground. Before they kidnap your friends...

(FOR COLECOVISION ONLY)
