

Suncom

Always ahead of the game

TAC-2™

It stands for Totally Accurate Controller and means it. With most joysticks, you can't feel your move until it's too late. With TAC-2, it's like your hand is part of the game. It has tactile feedback—you can feel absolutely, positively the exact moment you make a move. It also has extremely tight reaction time, short throw distance and right and left hand fire buttons to keep you ahead of the game. TAC-2 comes with a 2-year limited warranty—the longest, strongest warranty you can get. So get TAC-2. For you.

Model TAC

STARFIGHTER™ FOR APPLE*

This is no ordinary joystick. This is StarFighter, the analog joystick that gives you a feel and response you've never experienced before—because it has the new state-of-the-art thick film technology that no joystick's ever had before. Add throw selector, hi / lo sensitivity switch, and dual left / right firing buttons and you know why the play is so accurate, so controlled. StarFighter for Apple IIe (and Apple II and II-Plus with adaptor cable) comes with a 2-year limited warranty from Suncom, the people who are the Apple of joysticks.

Model SFA

ANIMATION STATION™ Touch Sensor Graphics Tablet

Paint, create, illustrate. Let your imagination take you where no man, or mouse, has gone before.

Draw circles around your keyboard! With Animation Station™ communication with your computer becomes much more natural, much more like real life. In fact, it's downright friendly.

Be entertained while learning about art, architecture, charts, graphs, engineering, graphic design, maps, mathematics, reading, science, music and many other subjects. Have fun by your self and with friends with graphically interactive game programs.

Writing a letter? Move words around, reposition paragraphs, make margins wider and have the freedom to change your mind with word processing programs.

Have you ever designed a room layout? Remember drawing out the borders, little squares for furniture, circles for lamps, rectangles for bookcases and so forth? Then remember when it didn't look right? Erasing. Redrawing. Little pieces of used up eraser everywhere. You can end that forever with Animation Station™. Move that sofa with a touch of the tablet's stylus. Make the dining room bigger with one stroke of your hand. When the design is as you like it, print it out and go arrange the room.

Replace your paddles, joystick and keyboard with

Animation Station™. It animates the use of your computer...makes it more alive than you ever dreamed possible. Look for Animation Station™ for most major home and personal computer systems. Model GTX.

From your friends at Suncom.

SYSTEM STATION™ Computer Furniture

Where do you put your new computer when you get it home or bring it to the office? On the dining room table? On the floor? In the closet? On top of your desk with the phone, calculator, bills pens, pencils, paperclips and everything else? Not anymore.

System Station™, Suncom's modular furniture system lets you install and store your computer, disc drives, monitor, diskettes, books, peripherals and accessories where they belong. By themselves. Exactly where you want them to be and nowhere else.

Solidly constructed, yet lightweight. On casters so they're easy to move, yet very stable. Pile on the monitor, computer and everything else and you'll see how System Station™ earns its reputation for sturdy reliability.

STARFIGHTER™ FOR IBM PCjr

Suncom's popular Starfighter in a version compatible for use with the IBM PCjr computer. IBM and PCjr are trademarks of International Business Machines Corp. Model SFI

JOY•SENSOR™

Look Ma, no stick! It's the joystick without the stick—the touch sensitive joystick controller. This electronic, digitally simulated controller has just the right combination of control and response—the slightest touch of your finger is all it takes to control movements on your game screen. Rock your finger or thumb back and forth—and it seems like Joy•Sensor reads your mind when you're ready to fire. Your fingers want your legs to run out and get Joy•Sensor—right now.*

* Joy•Sensor's rapid fire may not operate on all systems.

JOY•SENSOR™ FOR COLECOVISION*

If you've been waiting for a great joystick for your Colecovision, wait no more. It's here. It's Joy•Sensor, the digitally simulated joystick controller so technically advanced, it doesn't even have a controller stick or conventional firing buttons. Instead, it has touch sensitive controls. It gives you speed you didn't know you had. All your control movements are faster—because you don't have to move your entire hand or arm, just your finger or thumb. This Joy•Sensor is strictly to bring your Colecovision alive.

Model JSR

Model CSR

SLIK STIK™

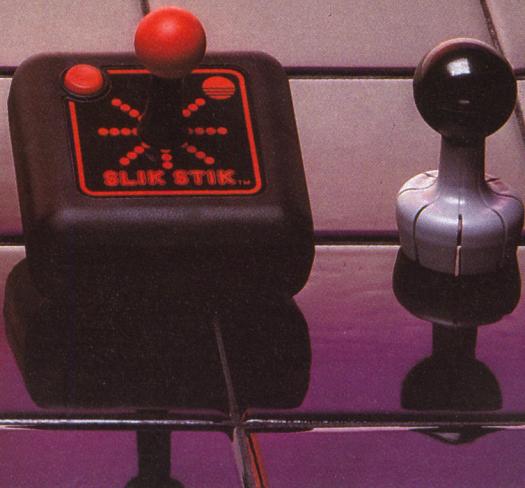

If you want a joystick that's comfortable to your hands but doesn't cost an arm and a leg, you want Slik Stik. Even if your allowance is limited, it won't take long to save up for Slik Stik. And it plays great. Even world champion video game players agree that Slik Stik controls your game so precisely, play takes on a whole new dimension. Comes with extra long cord—and the extra small price. Slik Stik from Suncom, because we know all kids aren't millionaires.

Model SSK

SNAPPER™ FOR COLECOVISION*

Somehow, the Coleco joystick doesn't quite seem like it's all there. But Snapper takes care of that—fast! It's the snap-on joystick height-extender specially designed for Colecovision controllers. No disassembly of controller is required. With Snapper, you know what it takes? — just a snap! No unscrewing. No gluing. No wonder it's such a popular item for Colecovision.

Model CLC

SUNCOM. STICK WITH US FOR JOYSTICKS AND ACCESSORIES AND YOU'LL BE AHEAD OF THE GAME TOO.

Suncom is one of the world's largest suppliers of accessories for videogames and computers. And no wonder. We not only keep up with videogame and computer advancements, we set the pace for accessories. Who uses old fashioned potentiometer and mechanical linkage assemblies? All the other joystick makers, that's who. Who uses state-of-the-art thick film resistive printing technology for joysticks? We do. Suncom. We're always ahead of the game.

SUNCOM ACCESSORIES

Lefty™ Joystick Adaptor. If you're left-handed, you don't have to be at a disadvantage. LEFTY transforms any Atari-type joystick to left-hand use. Model LTY

Joyex™ Joystick Extension Cable. You don't have to sit right in front of your videogame screen anymore. Each Joyex cable you add lets you get 6 feet farther away. Model JYX

UZI Fire. A better way to get rapid, machine-gun firing action into your games. Unlike other rapid-fire enhancers which use a rigid connection that can damage the joystick or computer, UZI Fire's connections are separated by a 6" flexible lead for extra protection. Model UZI

Apple Early Model Adaptor. Converts Starfighter for Apple joystick for use with Apple II, II+ and Franklin computers. Joystick works only with Apple IIe without this adaptor. Model SFA1.

IBM PCjr Joystick Adaptor. Converts Starfighter for Apple joystick for use with IBM PCjr (Peanut) computer. Model SFP.

SPEEDWINDER™ VHS. It takes the wait out of rewinding your VHS video cassettes. With Speedwinder, you take cassettes out of the VHS system before you rewind them. At the same time you put a cassette in the system to play, put the used cassette in the Speedwinder and rewind it twice as fast as your system. Goes fast forward too. How's that for convenience? Compact, lightweight, and quiet, Speedwinder from Suncom works on batteries or A / C.

Model SPD
