L A T E E D I T I O N S
.....

Dear ADAM user:

We are proud to offer a great new software package for ADAMites! SmartBEST, by Data Doctor, is a great enhancement to SmartBASIC. With SmartBEST you can now fully use ADAM's three voices and sound generator! SmartBEST also adds many new commands and improvements to SmartBASIC. Best of all, SmartBEST is available for ONLY \$19.95 (postage paid)! More information on SmartBEST is on the reverse side of this sheet.

We also have a supply of Coleco software available at discount prices. Our supply is limited so order now! Electronic Flashcard Maker, SmartLetters & Forms, and the Zaxxon Super Game are all only \$16.95 each! We also have Recipe Filer and the whole Flash Facts series available. These make great Christmas presents! If we run out of the item you want we'll send you back a prompt refund (you may wish to list alternates).

You'll be contacted as new software becomes available.

With best regards,

Jack Reedy

Introducing ...

SmartBEST

BASIC

Enhancement for
Sound and
Text

by DATA DOCTOR

SmartBEST adds 27 powerful enhancements to SmartBASIC. With SmartBEST you can add professional appeal to your own programs. With just a few exceptions SmartBEST is fully compatible with SmartBASIC. SmartBEST features:

***** AUDIO PLUS *****

SmartBEST includes nine commands for complete sound control. Six commands turn on and off each of ADAM's three voices: VOICE1, V1off, VOICE2, V2off, VOICE3, and V3off. Two commands turn on and off ADAM's sound generator: NOISE and OFF. And one command, HUSH, will instantly turn off all four possible sounds. All of these commands can be used in immediate or programming mode.

All three voice commands support 64 possible tones, 15 volume settings; and each one generates sounds independent of the others. To change the tone for any of the three voices just: POKE (voice #), (tone). That's all there is to it.

***** VIDEO PLUS *****

SmartBEST not only allows you to change screen and text colors using the TEXT command, but it also lets you change colors without clearing the screen! This lets you change screen or text colors without erasing the text!

***** COMMAND SHORTCUTS *****

Standard SmartBASIC lets you enter a "?" instead of the PRINT command. Having shortcuts like this speeds up programming. SmartBEST adds these shortcuts: F for FLASH; H for HOME; IN for INVERSE; NO for NORMAL; R for RETURN; and T for TEXT. When you list a program ADAM will change the abbreviations to the written out commands.

***** ASSORTED ENHANCEMENTS *****

SmartBEST also adds some new and improved commands:

The new gotOWPR command will make an instant switch to SmartWriter. Unlike pulling the RESET switch, this command will not load any medium in the drive(s).

The RESTORE command has been greatly improved. With the old RESTORE the data pointer would move to the very beginning of the data. The SmartBEST RESTORE lets you move the data pointer to a line number. This makes reading data much easier and faster! To use: RESTORE (line #):

SmartBEST also adds many other features to SmartBASIC. Once you've used SmartBEST you'll never go back to plain SmartBASIC. SmartBEST comes with a very detailed manual and includes all the information you need. SmartBEST is a must for every serious ADAM user, and at this price, no ADAM user can afford to go without it.

INTRODUCTORY PRICE: DATA PACK - **\$19.95**
Price includes postage.
